PROFESSIONAL SUMMARY

Flutter Engineer with around 2 years of hands-on experience building and deploying production-grade cross-platform mobile apps using Flutter, Dart, Kotlin, and React Native. Skilled in scalable app design using Clean Architecture and MVVM, with strong expertise in state management (Bloc, Provider, Riverpod) and RESTful API integration. Experienced in real-time data, QR payments, geolocation, and Bluetooth features. IEEE-published researcher passionate about mobile solutions.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Material Design, Cupertino, Kotlin, Jetpack Compose, React Native

Architecture & Patterns: Clean Architecture, MVVM, SOLID Principles

State Management: Bloc, Provider, Riverpod

Programming Languages: C#, JavaScript, Python, SQL, HTML, CSS

Backend & Databases: RESTful APIs, Node.js, ASP.NET Core, Express.js, FastAPI, PostgreSQL, MySQL, MongoDB, SQLite, JWT

DevOps & Cloud: Docker, Jenkins, AWS, Git, GitHub, GitLab, Linux, Firebase, Supabase

Testing & Tools: flutter_test, widget testing, unit testing, Figma, Adobe XD, Cursor, GitHub Copilot

EXPERIENCE

Freelance Flutter Developer | Self-Employed (Jan 2025 – Present)

- Designed and delivered cross platform mobile applications for clients with Flutter, Firebase, and Supabase, focusing on real-time and backend-driven features.
- Managed the full development lifecycle, from requirements and UI/UX to Play Store/App Store deployment.
- Built production-ready apps with real-time data, authentication, REST API integration, and geolocation features.
- Worked under client confidentiality (NDA) on private applications, ensuring quality, performance, and maintainability.
- Provided ongoing maintenance, feature updates, and technical support for deployed apps.

Freelance Flutter Developer | Fuelback Asia (Pvt) Ltd (May 2025 – Sep 2025)

- Note: Engaged as a dedicated contractor for the development of fintech and geolocation-based applications.
- Developed and maintained 2 production-grade Flutter applications supporting QR-based payment, geolocation-based services, Bluetooth integrations, and banking integrations.
- Designed scalable application architecture using Bloc and Provider for state management, collaborating closely with designers to ensure UI fidelity.
- Managed end-to-end stability and deployment, resolving logic errors and overseeing the full App Store/Play Store release lifecycle.

Intern Software Engineer | SixthFlow Research (Jul 2024 – Dec 2024)

- Built Flutter UI components for GeoTS V1.0, ensuring consistency, responsiveness, and smooth user interactions using Material components with a solid understanding of the Flutter widget lifecycle.
- Translated product requirements into pixel-perfect UI designs in Figma for GeoTS V2.0, collaborating with developers.
- Built the GeoTS V2.0 Native Android mobile app using Kotlin, Jetpack Compose, and Firebase.
- Conducted technical feasibility analyses on Choreo, Firebase, Astro, and LangChain to guide cloud architecture and AI integration decisions.

KEY PROJECTS

[BlogHub - Blog Application \(Clean Architecture\)](#)

Tech Stack: Flutter, Dart, Supabase (Auth, PostgreSQL, Storage), Bloc/Cubit, get_it, Hive, fpdart

- Developed a scalable Flutter blog application** using **Clean Architecture** ensuring maintainability and testability.
- Implemented authentication, session management, and secure sign-out using **Supabase Auth**.

- Applied **Bloc/Cubit** for state management and **GetIt** for dependency injection to keep modules decoupled.
- Added **offline blog caching** with **Hive** and **network-aware data flow** using connectivity checks and sync.
- Created **reusable Material** and **Cupertino UI components** with loading states, splash flow, and **light/dark theme**.

Music Streaming Application (MVVM Architecture)

Tech Stack: Flutter, Dart, FastAPI, PostgreSQL, Cloudinary, Riverpod (Generators), Hive, http

- **Built a full-stack music app** using **MVVM** and feature-wise architecture, ensuring a decoupled and scalable codebase.
- **Developed a RESTful API** with **FastAPI** and **PostgreSQL**, implementing **JWT auth** and automated data persistence.
- **Managed complex UI states** and **background audio** using **Riverpod Generators** for reactive, real-time performance.
- **Integrated Hive and Cloudinary** for **offline session persistence** and cloud management of high-quality media assets.

Safety Companion Mobile Application – Google Play Store

Tech Stack: Flutter, Dart, Firebase (Auth, Cloud Firestore, Firebase Core)

- Built a **personal safety app** with **SOS/emergency features**, **live location sharing**, **emergency calling**, and **nearby emergency place discovery**.
- Implemented **Firebase Authentication** and **Firestore** for secure user data management.

Railway Ticket Verification App with Fraud Detection

Tech Stack: Flutter, Dart, PostgreSQL, Firebase, Cloud Firestore

- Built a **Flutter mobile app** enabling railway inspectors to perform **real-time ticket verification** via **QR code scanning**.
- Implemented **backend integration** with **PostgreSQL** and **Firebase** to **validate bookings**, trigger **fraud alerts**, and update **verification status** in the field.
- Added **approval/rejection actions**, checker remarks, and verification history for **end-to-end audit traceability**.

PocketDesk – Mobile Issue Tracker (Clean Architecture)

Tech Stack: Flutter, Dart, BLoC, Hive, GetIt, CSV/share_plus, file_picker, fpdart

- Built an **offline-first** issue tracker with full **CRUD**, **status dashboards**, **real-time search/filter**, and **pull-to-refresh**.
- Applied **Clean Architecture** with **BLoC** for event-driven state management and **GetIt** for dependency injection.
- Implemented **CSV export** with native sharing, image attachments via **file_picker** and persistent **dark/light theming**.
- Wrote **flutter_test** unit tests covering CRUD, search, filter, and CSV export using temp Hive boxes and mocked services.

EDUCATION

B.Sc.Eng. (Hons) in Computer Engineering (2021 – Feb 2026)

University of Ruhuna | OGPA: 3.48 / 4.00

G.C.E. Advanced Level (Physical Science Stream) – 2 A's & 1 B (Aug 2019)

G.C.E. Ordinary Level – 9 A's (Dec 2016)

St. Peter's College Gampaha Branch

CERTIFICATIONS

[Introduction to TensorFlow for AI, Machine Learning, and Deep Learning](#) – DeepLearning.AI (2025)

[Introduction to Android Mobile Application Development](#) – Meta (2024)

[Supervised Machine Learning: Regression and Classification](#) – DeepLearning.AI (2023)

VOLUNTEER EXPERIENCE

President – Sri Lanka University Catholic Students' Movement (Sep 2023 – Oct 2024)

Organizing Committee Co-Chair (AXIOM) – IEEE Computer Society, University of Ruhuna (Jun – Oct 2023)

International Relations Manager (IGT) – AIESEC, University of Ruhuna (Jan 2022 – Jan 2023)

Awarded Most Outstanding IGT Member for term 21.22
